

## PROJECT PART 2

- **Team:** Meher Jain, Radhika Paryekarj, Subir Kumar Padhee
- **Title:** Hotel Management System
- **Project Summary:** A Hotel Management System in the form of a stand-alone application. It will allow customers, hotel administrative staff and other employees to access the hotel services, administrative activities and employee services respectively
- **Project Requirements:**

### ➤ User Requirements

User Requirement		
ID	Description	User
UR-01	As a new user, I should be able to sign-up in the system and create a role based profile	All Actors
UR-02	As an existing user, I should be able to login to the system	All Actors
UR-03	As a customer or receptionist, I should be able to make reservation	Customer, Receptionist
UR-04	As a customer, I should be able to cancel reservation	Customer
UR-05	As a customer, I should be able to order food	Customer
UR-06	As a customer or receptionist, I should be able to make payment	Customer, Receptionist
UR-07	As a customer, I should be able to give rating	Customer
UR-08	As a manager, I should be able to appraise employee	Manager
UR-09	As a manager, I should be able to approve leave request	Manager
UR-10	As a non-managerial employee, I should be able to apply for leave	Receptionist, Catering Staff, HR Staff, Housekeeping Staff
UR-11	As a housekeeping staff, I should be able to clean a room	Housekeeping Staff
UR-12	As a housekeeping staff, I should be able to manage supply inventory	Housekeeping Staff
UR-13	As a catering staff, I should be able to manage food inventory	Catering staff
UR-14	As a HR staff, I should be able to create pay slip	HR Staff
UR-15	As a HR staff, I should be able to organize training	HR Staff
UR-16	As an employee, I should be able to view my pay-slip	Receptionist, Catering Staff, HR Staff, Housekeeping Staff, Manager
UR-17	As an employee, I should be able to enroll for a training	Receptionist, Catering Staff, HR Staff, Housekeeping Staff

➤ **Business Requirements**

Business Requirement			
ID	Requirement	Topic Area	User
BR-01	Must be implemented in Java	Implementation	-
BR-02	Must be a stand-alone application	Implementation	-
BR-03	All employees must sign up using their hotel's (official) email ID	Authentication	Employees
BR-04	All employees' salaries must be disbursed on the first of each month	Payroll	Employees

➤ **Functional Requirements**

Functional Requirement		
ID	Requirement	Topic Area
FR-01	Password based authentication during user login	Authentication
FR-02	Automatically place order for items when the stock goes below preset threshold	Inventory
FR-03	On user login and logout record the respective date & time	Logging

➤ **Non-Functional Requirements**

Non-Functional Requirement		
ID	Requirement	Topic Area
NFR-01	The system should be up 24x7	Performance
NFR-02	The system should perform backup on data once a week	Reliability
NFR-03	The user password should be encrypted	Security

➤ **Use Cases Diagrams**

➤ **Actors:**

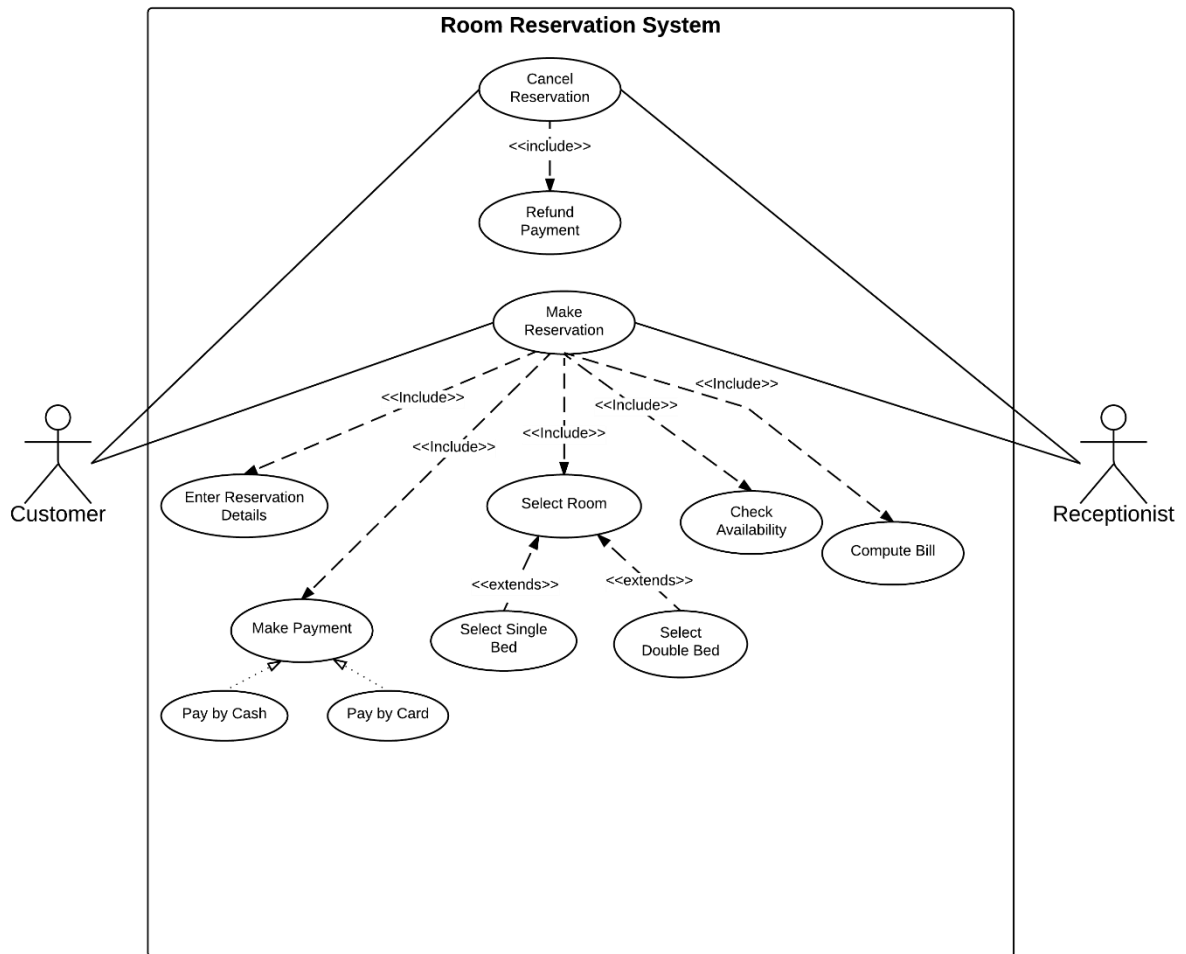

Customer, Receptionist, Manager, HR Staff, Catering Staff, Housekeeping Staff

➤ **Use Case Overview:**

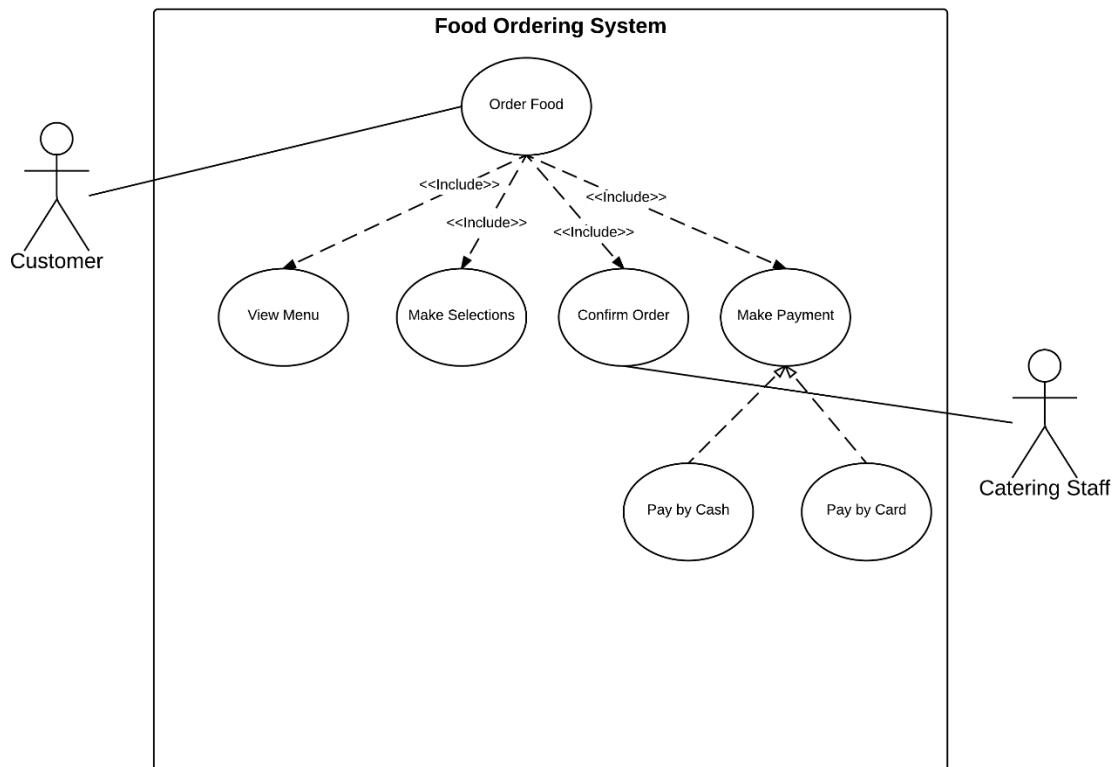

➤ **Sub-Diagrams**

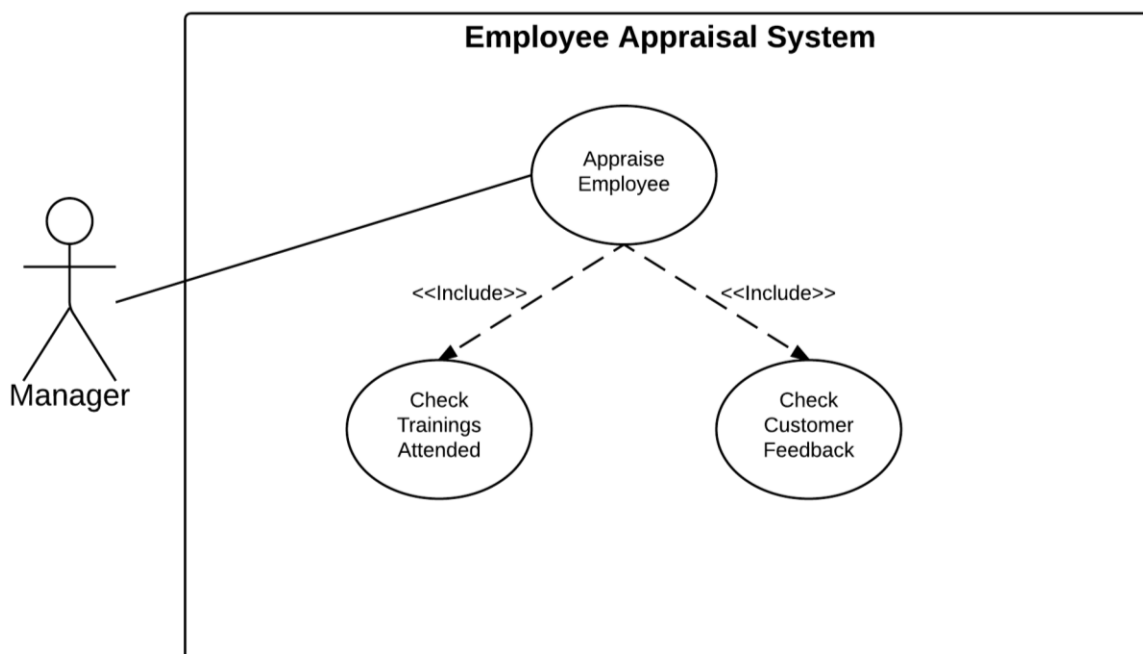

- **Make Reservation Use Case**

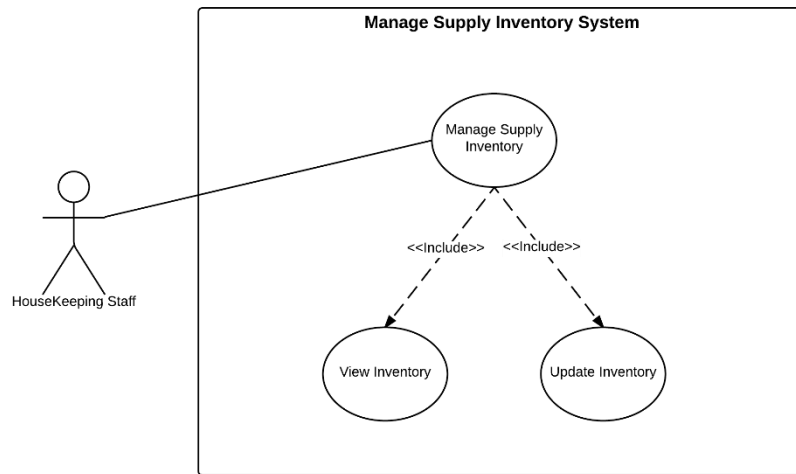

- **Order Food Use Case**

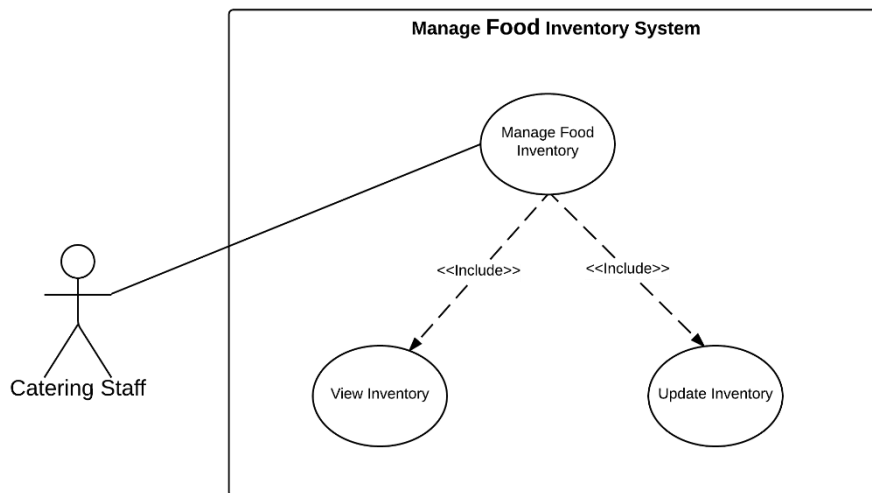

- **Appraise Employee Use Case**

- **Manage Supply Inventory Use Case**

- **Manage Food Inventory Use Case**

## ➤ Use Case Documentation

<b>Use Case ID:</b>	US-01		
<b>Use Case Name:</b>	Signup User		
<b>Description:</b>	User can sign up and enter information in the system		
<b>Actors:</b>	Customer, Manager, Receptionist, HR, Catering Staff, Housekeeping		
<b>Pre conditions:</b>	User is not signed up in the system		
<b>Post conditions:</b>	User is signed up in the system		
<b>Frequency of Use:</b>	Frequently throughout the day by the user		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Select Signup	Show create profile page
	2	Enter Details Agree to Terms & Condition	Verify the correctness of the details
	3	Click signup complete	Store the user information Notify User
	4	User is signed up in the system	
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-02
<b>Use Case Name:</b>	Login User
<b>Description:</b>	User can login to use the system

<b>Actors:</b>	Customer, Manager, Receptionist, HR Staff, Catering Staff, Housekeeping		
<b>Pre conditions:</b>	User is signed up in the system		
<b>Post conditions:</b>	User is logged in the system		
<b>Frequency of Use:</b>	Frequently throughout the day by the user		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Enter username & password Press login	Authenticate the user
	2	User logged in	
<b>Variations:</b>	1. User enters wrong username or password <ul style="list-style-type: none"> <li>System notifies the user, asks to enter the details again</li> <li>System will block the user in case of three wrong login attempts in the past half hour</li> </ul>		
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-03
<b>Use Case Name:</b>	Make Reservation
<b>Description:</b>	Customer can make room reservation

<b>Actors:</b>	Customer		
<b>Pre conditions:</b>	Customer is signed up in the system Customer is logged in to the system		
<b>Post conditions:</b>	Customer has room reservation		
<b>Frequency of Use:</b>	Frequently throughout the day by the customers		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Click on Make Reservation	Show the room reservation page
	2	Enter reservation details	Check Availability Compute Bill Show Room Details
	3	Click on Confirm Reservation	Show the payment page
	4	Click on make payment and enter card details	Process Payment Update Room availability Notify customer Notify Receptionist
	5	Takes keys from the receptionist	
<b>Variations:</b>	1. Customer wants receptionist to make reservation <ul style="list-style-type: none"> <li>Receptionist makes the reservation for the customer</li> </ul> 2. Requested Room not available <ul style="list-style-type: none"> <li>Customer is notified and can modify the details</li> </ul>		
<b>Exceptions:</b>	4. Payment Fails <ul style="list-style-type: none"> <li>Customer is notified and given option for repayment</li> </ul> 3. Customer decline to confirm reservation <ul style="list-style-type: none"> <li>Use Case Unsuccessfully ended</li> </ul>		
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-04
<b>Use Case Name:</b>	Cancel Reservation
<b>Description:</b>	Customer can cancel room reservation

<b>Actors:</b>	Customer		
<b>Pre conditions:</b>	Customer is signed up in the system Customer is logged in to the system Customer has room reservation in the hotel		
<b>Post conditions:</b>	Customer has cancelled reservation		
<b>Frequency of Use:</b>	Frequently throughout the day by the customers		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Click on Cancel Reservation	Cancel Reservation Refund Payment Notify Customer Update Available rooms
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-05
<b>Use Case Name:</b>	Order Food
<b>Description:</b>	Customer wants to view food menu and order food.

<b>Actors:</b>	Customer		
<b>Pre conditions:</b>	Customer wants to order food Customer is logged in to the system		
<b>Post conditions:</b>	Customer successfully orders food		
<b>Frequency of Use:</b>	Frequently-many times a day		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Click on Order Food button.	Display the menu that allows selecting dish, quantity and confirming order.
	2	Make selections and click on Confirm Food order	Create an order of Food items Confirm the order with the catering staff (if they can serve the order) – elicit their approval or rejection Compute bill Add to the customer's account Notify catering staff to deliver food Catering Staff Delivers Food
<b>Variations:</b>	2. Customer is not put up in the hotel Bill is not added to account Customer makes the payment		
<b>Exceptions:</b>	1. Requested food not available in the requested quantity		
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-06
<b>Use Case Name:</b>	Make Payment
<b>Description:</b>	Customer can make payment for his/her hotel bill

<b>Actors:</b>	Customer		
<b>Pre conditions:</b>	Customer is signed up in the system Customer is logged in the system		
<b>Post conditions:</b>	Customer has made payment		
<b>Frequency of Use:</b>	Frequently throughout the day by the customers		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Select make payment	Show payment page
	2	Enter payment details	Process payment Notify customer
<b>Variations:</b>	2. Payment fails Customer is given option for repayment		
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-07
<b>Use Case Name:</b>	Give Rating
<b>Description:</b>	Customer can give rating to provide feedback to hotel

Actors:	Customer		
Pre conditions:	Customer is signed up in the system Customer is logged in the system		
Post conditions:	Customer has given rating		
Frequency of Use:	Frequently throughout the day by the customers		
Flow of Events:		Actor Action	System Response
	1	Select Give Rating	Display Give Rating Page
	2	Enter employee name	Save Rating & Feedback for the selected employee
	3	Select the Rating Enter Feedback	
Variations:			
Exceptions:			
Developer Notes:			

<b>Use Case ID:</b>	US-08
<b>Use Case Name:</b>	Appraise employees
<b>Description:</b>	Manager can appraise employees by checking attended training list and customer rating

<b>Actors:</b>	Manager		
<b>Pre conditions:</b>	Employee appraisal is due for the year Manager is already signed up in the system Manager is already logged in the system		
<b>Post conditions:</b>	Appraisal done for the employees		
<b>Frequency of Use:</b>	Once a year for every employee		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Query the system for number of trainings pending for a particular employee	Furnish the information by reading from the records
	2	Query the system for customer ratings for a particular employee	Furnish the information by reading from the records
	3	Update employee appraisal	Store the update in the records
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-09
<b>Use Case Name:</b>	Approve leave request
<b>Description:</b>	Manager approves leave requests of employees by accessing leave availability of the employee

<b>Actors:</b>	Manager	
<b>Pre conditions:</b>	At least one employee should have requested for a leave Manager is already signed up in the system Manager is already logged in the system	
<b>Post conditions:</b>	Manager approves the leave request	
<b>Frequency of Use:</b>	Sporadic. Could be multiple times a day or even once a week	
<b>Flow of Events:</b>		
	<b>Actor Action</b>	<b>System Response</b>
	1 Query the system for number of available leaves for a particular employee	Furnish the information by reading from the records
	2 Approve leave	Update in the records so that employee can know
<b>Variations:</b>	2. Manager rejects the leave request	
<b>Exceptions:</b>		
<b>Developer Notes:</b>		

<b>Use Case ID:</b>	US-10
<b>Use Case Name:</b>	Apply for leave
<b>Description:</b>	A non-managerial employee should be able to apply for leave

<b>Actors:</b>	Receptionist, HR Staff, Catering Staff, Housekeeping		
<b>Pre conditions:</b>	User is already signed up in the system User is already logged in the system User should have positive leave balance		
<b>Post conditions:</b>	User has applied for leave		
<b>Frequency of Use:</b>	Sporadic. Could be multiple times a day or even once a month		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Apply for leave	Notify the Manager about the leave application
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-11
<b>Use Case Name:</b>	Clean Room
<b>Description:</b>	Housekeeping Staff can clean a room

<b>Actors:</b>	Housekeeping Staff		
<b>Pre conditions:</b>	Housekeeping is signed up in the system Housekeeping Staff is already logged in the system		
<b>Post conditions:</b>	Housekeeping Staff cleans unoccupied rooms		
<b>Frequency of Use:</b>	Frequently throughout the day by the Housekeeping staff		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1.	Check Room Occupancy	System displays all unoccupied rooms
	2.	Cleans the room	
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-12
<b>Use Case Name:</b>	Manage Supply Inventory
<b>Description:</b>	Housekeeping Staff can view and update the supply inventory

<b>Actors:</b>	Housekeeping Staff		
<b>Pre conditions:</b>	Housekeeping Staff is signed up in the system Housekeeping Staff is logged in the system		
<b>Post conditions:</b>	Housekeeping Staff updates inventory System places order if supplies go below a threshold and notifies the Housekeeping Staff		
<b>Frequency of Use:</b>	Frequently throughout the day by the Housekeeping staff		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Click on Manage Supply Inventory Button	Get Supply Inventory from database Display the Supply Inventory
	2	View Supply Inventory	
		Enter Information to be updated	Take input from the user.
		Click on Update Supply Inventory Button	Update the supply inventory table in the database. Check if supplies are below the threshold. Place order for supplies below the threshold Notify the Housekeeping Staff
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>	If supplies go below a threshold, the system automatically places an order for that particular supply.		

<b>Use Case ID:</b>	US-13
<b>Use Case Name:</b>	Manage Food Inventory
<b>Description:</b>	Catering Staff can view and update the food inventory

<b>Actors:</b>	Catering Staff		
<b>Pre conditions:</b>	Catering Staff is signed up in the system Catering Staff is logged in the system		
<b>Post conditions:</b>	Catering Staff updates inventory System places order if supplies go below a threshold and notifies the Catering Staff		
<b>Frequency of Use:</b>	Frequently throughout the day by the Catering staff		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Select Manage Food Inventory	Get Food Inventory from database Display the Food Inventory
	2	View Food Inventory	
	3	Enter Information to be updated	Take input from the user
	4	Click on Update Food Inventory Button	Update the food inventory table in the database. Check if supplies are below the threshold. Place order for food supplies below the threshold Notify the Catering Staff
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>	If supplies go below a threshold, the system automatically places an order for that particular supply.		

<b>Use Case ID:</b>	US-14
<b>Use Case Name:</b>	Create Pay-Slip
<b>Description:</b>	HR staff can create pay slips

<b>Actors:</b>	HR Staff		
<b>Pre conditions:</b>	HR staff is signed up in the system HR staff is logged in the system		
<b>Post conditions:</b>	HR staff creates pay slip		
<b>Frequency of Use:</b>	Frequently throughout the day by the Housekeeping staff		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Check staff attendance	System displays attendance of all staff
	2	Create Pay Slip	Inputs information from the actor and creates pay slip for the employee
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	US-15
<b>Use Case Name:</b>	Organize training
<b>Description:</b>	HR staff organizes role based training workshop, so that new employees can undergo training

<b>Actors:</b>	HR staff		
<b>Pre conditions:</b>	There are new employees who need to undergo training HR staff is already signed up in the system HR staff is already logged in		
<b>Post conditions:</b>	A new training is organized (scheduled)		
<b>Frequency of Use:</b>	Quarterly or as and when need arises.		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Query the system for number of employees (in a particular role) who need training	Furnish the information by reading from the records
	2	Schedule a training	Update the records so that concerned employees know that a training is due
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

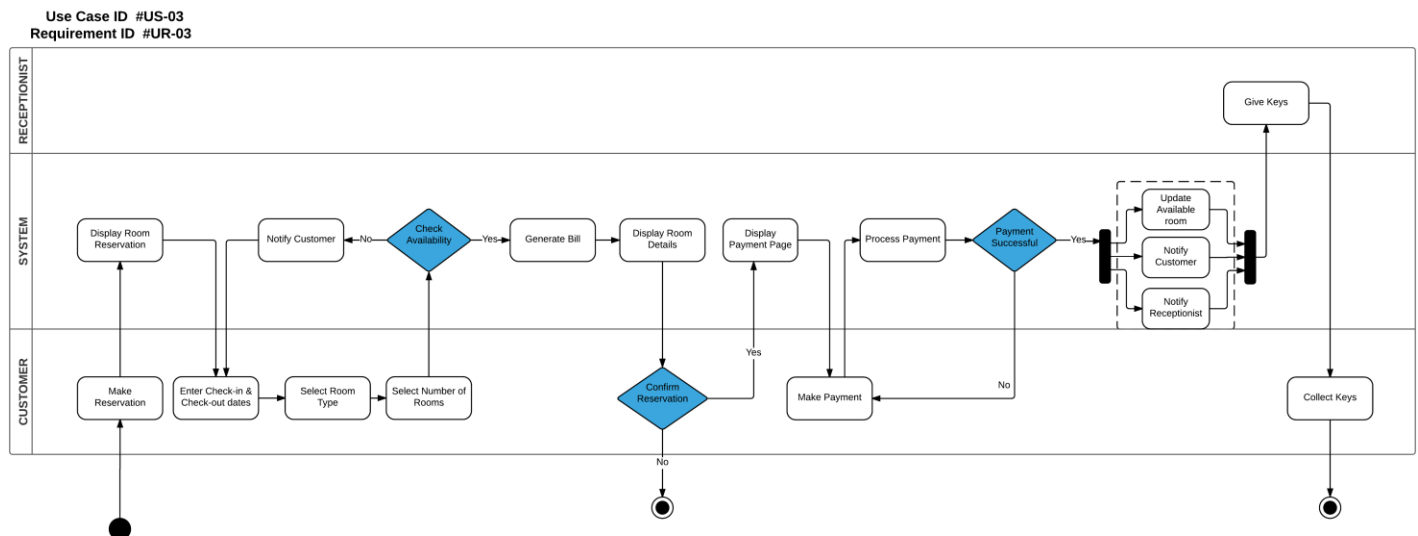

## ➤ Activity Diagrams:

### ➤ Use Case Name: Make Reservation [Use Case ID #US-03] (By- Meher Jain)

**Description:** This activity diagram allows the customer to make reservation in the hotel and pay for the bill. It goes through all the activities involved in the process of making reservation.

ACTIVITY DIAGRAM: MAKE RESERVATION

MEHER JAIN | October 12, 2016

➤ **Use Case Name: Manage Supply Inventory [Use Case ID #US 12] (By- Radhika Paryekar)**

**Description:**

This use case will allow the housekeeping staff to view and update the food Inventory. Also, if the supplies go below a preset threshold the system will automatically place an order and notify the housekeeping staff.

USE CASE: MANAGE SUPPLY INVENTORY

RADHIKA PARYEKAR | October 12, 2016

Requirement ID #UR-12, #FR-02  
Use Case ID #US-12

➤ **Use Case Name: Manage Food Inventory [Use Case ID #US 13] (By- Radhika Paryekar)**

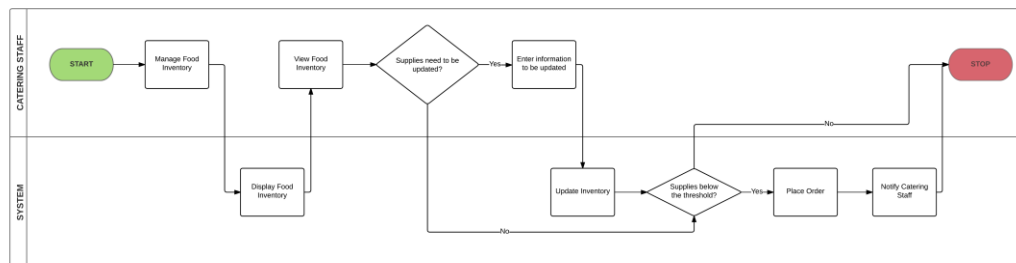

**Description:**

This use case will allow the catering staff to view and update the food Inventory. Also, if the supplies go below a preset threshold the system will automatically place an order and notify the catering staff.
